

## Ambius Scenting Services

The newly opened 5-star Montcalm Hotel in Central London has Ambius's stunning plants, containers and flowers in public areas. It has also recently introduced Ambius personal scenting for guest bedrooms.

### The Microfresh Solution

Thanks to Ambius's **Microfresh Cube**, Montcalm Hotel guests now have the ultimate luxury – a scent menu from which they can pick a personal aroma for their room. The menu includes scents such as [Saw Grass](#), [Lotus Flower](#) and [Marine Fresh](#).

The Montcalm also uses Ambius Microfresh to subtly scent the entrance lobby with [Refreshing Lavender](#).

### The Hard Rock Hotel and Casino

Many other companies around the world also use

Ambius to scent their premises. The Hard Rock Hotel and Casino for example uses Ambius Microfresh to enhance indoor air quality in its 150,000 sq ft gaming area to mask a tobacco odour problem that couldn't be banished even by aggressive cleaning and fresh air ventilation systems.

### The Sweet Smelling Solution

Ambius created a scent consistent with Hard Rock's hotel amenities, [Sawgrass](#), which was added to an advanced odour neutraliser for tobacco. It was

demonstrated in a 5,000 sq ft cocktail lounge and the malodours were completely eliminated. In their place was the venue's pleasant and memorable signature scent.

Following the month-long trial, Ambius was awarded a three-year contract to provide ambient scenting services in the hotel lobby, gaming and adjacent areas.
