

UK post services

Recent changes in the UK postal market have enabled City Link to offer a wide range of innovative postal solutions at a very cost effective price.

So whether a customer is sending large volumes of post using traditional mail sort options, or smaller quantities of metered post, they will benefit from using City Link's high quality services. City Link's post services offer a simple and reliable way of sending items anywhere in the UK or worldwide.

UK Post Services

- Bulk mail - for sorted mailings with volumes of over 4,000 pieces per mailing.
- Unsorted service - for unsorted mailings of 250 pieces or more per mailing.

- Unsorted Packets - for low value bulky mail items that are too large to be sent as large letters.

City Link will collect post from a customer's office or mailing house free of charge and deliver the post into the relevant local Royal Mail Inward Mail Centre for 'final mile' delivery. It's the perfect solution for all business needs – for example, for sending invoices, communications to customers, prospect, catalogues and information brochures.

International Post Services

City Link's International postal solutions also allow it to offer a wide range of products tailored to meet business customers' needs at cost effective prices. Customers don't have to sort by country, format or destination, weigh or frank the mail, as City Link will handle all of this.

And customers can be sure their post is in good hands, whatever its final destination, as City Link is accredited by the Mail Consolidators Association.
